6: <BODY>
7: <TT>
8: <P>
9: This lab0-intro-unix will not be graded and there
10: is no credit for it.&nbsp;
11: However, it is important you understand the Unix command
12: line and submit procedure before you actually use it in the
13: first assignment.
14: <P>
15: Make sure you know how to submit files.&nbsp;
16: Submit these files to lab0.&nbsp;
17: Verify that the submit actually worked by looking
18: in the submit directory for your username.&nbsp;
19: The find(1) command is very useful for things like this.&nbsp;
20: <P>
21: The submit command copies your files into a directory
22: <BR>
23: <TT>/afs/cats.ucsc.edu/class/cmpts109-wm.s15/lab0/$USER</TT>
24: <BR>
25: and prefixes each file with a sequence number.&nbsp;
26: You can see the names of the files,
27: but not their contents.&nbsp;
28: <P>
29: Prior experience with Unix is assumed.&nbsp;
30: Attend a lab section to ask questions if you don't
31: understand how submit works.
32: The TA can explain such things.&nbsp;
33: <P>
34: Also read the submit checklist:&nbsp;
35: <BR>
36: <A HREF=
37: http://www2.ucsc.edu/courses/cmpts109-wm://Syllabus/submit-checklist/>
38: http://www2.ucsc.edu/courses/cmpts109-wm://Syllabus/submit-checklist/
39: </A>
40: <P>
41: This directory shows a main program and a hello class and
42: illustrates various features of C++11 that will be covered
43: later in the course.&nbsp;
44: <P>
45: Whenever you need to look up information about C++,
46: use Google,
47: or look at
48: The C++ Resources Network:&nbsp;
49: <BR>
50: <A HREF=http://www.cplusplus.com/>
51: http://www.cplusplus.com/</A>
